

Trimble and Intelligent Audit Partner to Provide Robust Freight Auditing and Greater Visibility to the Supply Chain

Integration Enables Shippers to Access Leading Visibility and Audit Solutions in the Transportation Space

SUNNYVALE, Calif. and ROCHELLE PARK, N.J., Nov. 19, 2018—Trimble (NASDAQ: TRMB) and Intelligent Audit, a leader in freight audit and transportation spend optimization, announced a collaboration to integrate their solutions to enable users to benefit from both real-time visibility and one of the most robust audit analytics tools in the industry.

The collaboration between Trimble and Intelligent Audit allows the two companies to provide a solution that solves some of the most significant pain points for shippers today. Users can access visibility and tracking through Trimble's supply chain solution and audit and spend analytics through Intelligent Audit. In addition, Intelligent Audit and Trimble's data sharing will enable both companies to enhance their products, providing a compelling solution for users in the transportation and logistics industry.

"Customers of both companies will benefit from this new integration that provides a solution for the supply chain," said Joe DeBoth, vice president and general manager, Trimble Transportation Visibility. "Users have access to improved reporting and analytics with the added freight visibility and tracking abilities through the audit process."

"We were the first company to automate the audit and recovery process in transportation," said Hannah Testani, chief operating officer at Intelligent Audit. "Each year since our inception, we've worked hard to continuously improve our product. Working with Trimble to tap valuable supply chain data will further advance the audit process and is another step in the evolution to continually reduce transportation costs, improve customer experience, and enhance visibility throughout the supply chain."

Trimble's Visibility solutions provide supply chain organizations with visibility into operations featuring a secure, multimodal, real-time information platform. Its features include: Transportation Management System (TMS) integrations, dynamic ETAs, proactive weather and risk alerts, rich data down to the SKU level, temperature control tracking, exception management and final mile functionalities, efficient workflow automation, and a world-class, user-friendly interface.

About Intelligent Audit

Founded in 1996, Intelligent Audit is the technology leader in freight audit and payment, business intelligence analytics, and transportation spend optimization. Intelligent Audit helps customers reduce spend with its industry-leading audit solution and reporting engine which uncovers opportunities for cost reduction and supply chain process improvements.

With more than 2,500 clients representing more than \$9 billion in aggregate transportation spend across all modes and geographies, Intelligent Audit provides insights that help customers ship smarter. For more information, visit: www.intelligentaudit.com.

About Trimble Transportation

Trimble Transportation is multi-modal and provides solutions for the long-haul trucking, field service management, rail and construction logistics industries to create a fully integrated supply chain. In trucking, Trimble provides enterprise and mobility solutions focused on business intelligence and data analytics; safety and regulatory compliance; navigation and routing; freight brokerage; supply chain visibility and final mile; transportation management and fleet maintenance. With an intelligent ecosystem of products and services, Trimble enables customers to embrace the rapid technological evolution of the industry and connect all aspects of transportation and logistics—trucks, drivers, back office, freight and assets. Through the combined legacy of ALK, PeopleNet, TMW Systems and 10-4 Systems, Trimble delivers an open, scalable platform to help customers make more informed decisions and maximize performance, visibility and safety.
