TMC Selects Trimble Instinct and Video Intelligence Solutions for Better Connected Safety and Driver Experience

WESTMINSTER, Colo., June 27, 2024 /PRNewswire/ -- Trimble (NASDAQ: TRMB) announced today that TMC, based inDes Moines, Iowa, has selected Trimble's Instinct and Video Intelligence fleet management solutions to improve the overall safety, compliance and operational efficiency of its fleet.

Founded in 1972, TMC is a leader inNorth America's flatbed transportation services and the largest privately-held flatbed carrier in the U.S. After more than 50 years in business, TMC continues its commitment to customer satisfaction and quality performance by adopting the latest in transportation technology to improve both driver experience and back-office visibility.

"TMC is an employee-owned company with a driver-first culture, and we are committed to providing quality service to our customers," said Matt Paige, EVP of risk management at TMC. "Trimble's driver-centric solutions Instinct and Video Intelligence align completely with our company philosophy – and support our key trucking stakeholders both in the cab and the back-office."

Instinct is Trimble's next-generation telematics and fleet management solution, improving productivity and performance through effective driver workflows and an innovative mobile platform that connects drivers with the back-office to streamline operations. Its integrated suite of applications creates unprecedented connection between back-office and cab, enhancing the driver, dispatch and telematics experience while improving operational efficiency and regulatory compliance.

According to the AAA Foundation for Traffic Safety, installing video-based onboard safety monitoring systems on all large trucks could potentially prevent an estimated 63,000 crashes, 17,700 injuries and 290 deaths over the course of a year. Trimble Video Intelligence is an award-winning safety solution that reduces risk for drivers and provides fleets with a neutral eyewitness perspective in and around their vehicles. Through a combination of high-definition forward, side and rear-facing cameras, Trimble Video Intelligence helps fleets protect themselves—triggering video by company-controlled settings to facilitate driver coaching opportunities and capture high-resolution video in the event of an accident.

"Trimble and TMC are aligned in a shared vision – to create a safer, more efficient transportation industry by combining best-in-class fleet performance with best-in-class technology," said Paul Cardosi, sector vice president of telematics & fleet management for Trimble. "Instinct and Video Intelligence will help TMC realize this vision, providing an upgraded fleet management experience that seamlessly connects their office personnel and drivers."
