

Trimble Freight Audit Launches in North America

Optional Add-on Service from Triumph Brings Further Visibility and Predictability to the Audit-payment Ecosystem

WESTMINSTER, Colo., November 13, 2025 —

Trimble today introduced its new Freight Audit software solution designed to automate and streamline the freight auditing process. [Trimble Freight Audit](#) is designed to expedite end-to-end auditing operations by eliminating inefficiencies and manual tasks required for ensuring compliance with contracts and payment terms.

To manage the complete audit and payment cycle, the solution offers North American shippers and Logistics Service providers (LSPs) optional add-on payment services through the Triumph Network. With flexible support for broker workflows, Freight Audit enhances financial transparency, helps improve cash flow management and can further streamline freight settlement for the logistics industry.

Trimble Freight Audit Launches in North America with Optional Add-on Service from Triumph

Today's freight market is increasingly complex as shippers encounter fragmented data, high costs and inefficient manual auditing. Trimble Freight Audit automates the audit process by cutting down on manual tasks and errors to help drive compliance with contracts and payment terms from the beginning. By leveraging the Triumph Network, an extensive carrier payment infrastructure provided by Triumph, and freight audit capabilities with Trimble Freight Audit, customers can gain an optimized, freight audit and payment workflow.

Customer benefits of using Freight Audit and the services in the Triumph Network include:

- **Enhanced Cash Flow & Transparency:** Shippers can gain real-time insights into their freight spend, reducing payment discrepancies and improving financial planning. Logistics Service Providers (LSPs) can gain greater visibility and insight into their receivables through the Triumph Network, enabling treasurers to monitor and manage cash flow effectively.
- **Automated Invoice Processing:** The Triumph solution automates critical processes such as payment processing, reconciliation and exception management — and accelerates payment cycles, minimizing disputes and operational friction. Eligible carriers can be paid within minutes of invoice approval — 24/7/365 — subject to Triumph Network participation and approval criteria.
- **Compliance & Security:** The Freight Audit solution helps to ensure regulatory compliance and reduce financial risk while Triumph offers seamless payments within a trusted framework by employing advanced fraud detection systems. These measures help ensure more secure transactions with only verified entities participating in the payment process.
- **International Payments Made Simple:** Triumph supports USD, CAD and MXN, making cross-border payments as straightforward as domestic ones. The solution is also adaptable to organizations of all sizes — from regional shippers to global enterprises.

Headquartered in Dallas, Texas, Triumph is a financial and technology company serving the transportation industry with payments, intelligence and banking solutions powered by the Triumph Network. Its payment solutions boost automation, reduce fraud and enhance back-office efficiency.

"Trimble's collaboration with the Triumph Network marks an exciting step forward in our efforts to simplify freight payments," said Matthew Silver, SVP of enterprise partnerships at Triumph. "By combining our real-time payment infrastructure with Trimble's audit capabilities, shippers, brokers and carriers can move money with greater speed, accuracy and trust, while reducing friction and fraud across the supply chain."

"Trimble Freight Audit is a game-changer for the logistics industry thanks to the collaboration with the Triumph Network," said Dan Popkin, sector vice president, strategic customers and channel partners at Trimble. "By enabling more accurate audit information with a freight invoice payment and management system, our shared customers gain unparalleled visibility and control over their spending. This ultimately helps boost profitability and reduce risk through streamlined and more secure financial operations."

Availability

Trimble Freight Audit is available to shippers, brokers and LSPs in North America.
